

Cyta on optical cable

Overview

Cyta announces the start of operations on the ARSINOE optical fiber subsea cable system, which will cover the country's increased need for international connectivity in crucial areas, especially for Internet and Cloud services. This innovative technology provides Internet access at speeds of up to 2Gbps! By making one of the biggest-ever investments in telecommunications in Cyprus. Our submarine fiber network connects Cyprus to Greece, Italy, France, Israel, Syria, Lebanon, Egypt and thereafter with the rest of the world We maintain an extensive state-of-the-art submarine optical fiber cable network in the Eastern Mediterranean basin, using full restoration and diversity. We. The Cyprus Telecommunications Authority (CYTA) is the leading telecommunications provider in Cyprus. Price is influenced by raw material costs, manufacturing scale, and regional policy shifts. At the core of the cable lies a metal or non-metallic strength member.
