

Dimensions of a power distribution box for construction in Bissau New Zealand

Overview

For a single phase installation with or without controlled power metering, an unencumbered mounting plate, or mounting rails, with minimum dimensions of 430mm high, 360mm wide, 120mm deep (clearance from the mounting plate/rails to the inside of the closed door). Suitable as a Domestic Electric Meter enclosure for Outdoor use. PVC gear plate, hinged for easy access. Dimensions are 600H x 400W x 210D Designed. Residential Enclosures | Outdoor Meter Boxes | ! Gyro specialises in exterior plastic enclosures for use in metering or temporary power installations around New Zealand. Our product range of builders & meter boxes provides a durable and strong enclosure that stands out on the building site, making it easy for you to locate and fit your electrical. Low voltage network switchgear assets are often located in publicly accessible places: on berms, in footpaths and driveways, in town centres, where public safety as well as operator safety is a paramount consideration.
