

FC Interface Card Firmware Update

Overview

Open Device Manager, find the FC card, right-click a port, and choose Update Driver Software from the shortcut menu, as shown in Figure 17-20. Having trouble connecting your flight controller (FC) to Betaflight configurator on your computer, or flashing firmware?

In most cases, this is caused by missing or incorrect drivers, or bad cable. In this tutorial, I'll explain the potential causes and simple step-by-step solutions to help you fix. Download a Windows FC card driver from the official QLOGIC website. This contains both VCP and D2XX drivers. Refer to our Installation Guides for more information. Virtual COM port (VCP) drivers cause the USB device to appear as an additional COM port available to the PC. [Click here to](#). Access product support documents and manuals, software, download drivers by operating environment, and view product support videos. You are viewing the most relevant and current results for this product. Did you find what you need?

Was it easy to find?
