

Fiber Optic Cable Grid Coverage

Overview

A detailed map showcasing the availability and distribution of fiber internet services across the United States, highlighting key regions with comprehensive coverage and potential fiber expansion areas. You will receive a one time code that you will enter here. The map will be updated continuously to improve its accuracy through a combination of FCC verification efforts, new data from Internet. This visualization shows the growth of the undersea cable network, global internet peering capacity, and the distribution of IP addresses via BGP announcements over time. Use the controls at the top to play the animation or step through year by year. Fiber-optic internet is the fastest and most reliable type of internet connection available. It uses. The FCC discontinued Form 477 on Dec. 31, 2022, and transitioned to the new Broadband Data Collection which identifies broadband availability based on broadband serviceable locations (BSLs).
