

Fiber optic cable outer sheath representation

Overview

1 The outer cable jacket shall be marked with the manufacturer's name, date of manufacture, fiber count, fiber type, flame rating, listing symbol, and sequential length markings every two feet (e., "CORNING OPTICAL COMMUNICATIONS OPTICAL CABLE - MM/YY. XXXXX (feet. One important consideration when selecting indoor fiber optic cables is the outer sheath material and its fire prevention level. Each cable is single packed in a polybag with a test report that guarantees best performance in typical application scenarios like telecommunication, rack cabling, sensor technologies or indust Choosing the appropriate outer sheath material for fiber optic cables is crucial for ensuring the cable's durability, protection, and performance under specific environmental conditions. At the same time, it must have. 1. 1 The cable shall meet all requirements stated in this specification. Glass fiber and plastic fiber is fragile.
