

How to cut a 150mm cable tray elbow

Overview

Follow these steps to cut the stainless steel cable tray: 1. Begin cutting with slow, steady strokes if using a hacksaw, or carefully guide the power saw along the marked line. Apply consistent. Cutting a 150mm (6-inch) elbow requires more than just a steady hand; it requires a perfect layout. In this video, we demonstrate how to mark, wrap, and cut. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. Each example of bends and tee's clearly illustrate proper tray cutting combined with recommended usage of Cablofil accessories. Oglænd System manufacture and deliver Multidiscipline modular bolted support systems, cable trays, cable ladders and accessories for complete installation and containment of Instrument, Electrical, Telecom, HVAC and Piping. This comprehensive guide will walk you through the process of cutting stainless steel cable trays effectively and safely. They are commonly used in industries such.
