

How to install the cable tray beam bend

Overview

The fittings can be fastened to the cable tray rail either with double clamps of type DOP A2 or with truss-head bolts of type FRS and combination nuts. The exceptions to this are vertical bends, adjustable bend elements and fittings with a side height of 35 mm. These fittings can only be screwed on. Beam bracket PK1 is attached to the lower flange of an I beam. These guidelines are not intended to cover all details or variations in cable ladder and cable tray. When completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is subjected to the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when. Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support.
