

# How to use a 96-core fiber optic patch panel

## Overview

These high-density fiber patch panels allow a mix-and-match of e2XHD fiber and copper snap-in cassettes - up to 96 LC fibers or 48 copper ports per RU. Cassettes quickly snap in and pull out of the panel, making installation and changes easier than ever. These individual strands will then connect to electronic devices. This is precisely the problem the MPO/MTP® patch panel was designed to solve. Frankly, if you're deploying 40G, 100G, or higher, you can't afford to ignore this technology. The 96 Core Slide Drawer Patch Panel 1U UHD MPO/MTP-LC 4 Cassette is a versatile solution for high-density fiber management in data centers and telecom networks. Designed for 19" rack-mount cabinets, it accommodates up to four HD MPO/MTP-LC cassettes, providing a plug-and-play system that. OptoSpan's WM-96 Wall Mount Termination and Splicing Enclosures provide a convenient, secure and organized housing for fiber optic connections and terminations, as well as a central point for splicing fiber optic cables for indoor or outdoor installations.
