

Mauritania Well Logging Fiber Cable

Overview

In a transformative leap toward digital progress, EllaLink — the company behind the high-capacity transatlantic optic-fibre system — has unveiled a major infrastructure initiative that will directly connect Mauritania to Europe via a new subsea cable system by early 2027. EllaLink and the Islamic Republic of Mauritania today marked the successful landing of a new subsea cable in Nouadhibou, giving the country a second direct, diverse and secure connection to European and international digital hubs. The landing is a defining step for Mauritania's digital sovereignty. These Terms and Conditions ('the Terms') govern your use of the website on the Internet located at www.com ('the Site') and are legally binding on you. The Site is owned and operated by Developing Telecoms Limited ('the Owner', 'we', 'us', 'our'). The cable will deliver an initial capacity of 200 Gbps, scalable to 12 Tbps, linking the country to Europe and South America.
