

Parameters of a 10-port PoE switch

Overview

10-Port Gigabit PoE+ Switch, using high-quality high-speed network IC and the most stable POE chip, POE port meets 802.3af/at standard, this series of PoE Switch can be 10/100/1000M Ethernet. The network provides a seamless connection, and the PoE . PoE: Power over Ethernet (PoE) is a technology that allows Ethernet cables to carry electrical power, along with data, to powered devices. The initial allocation for Class 0, Class 3, and Class 4 powered devices is 15. When a device starts up and uses CDP or LLDP to send a request for more than. Prioritized to make the video smoother. The device supports the IEEE 802.3af/at standard, so there is no need to worry about damaging port, over temperature protection, etc. Power Consumption 1U, professional-grade 10-port, Layer 3 Etherlighting™ PoE+++ switch with (10) 10 GbE and (2) 10G SFP+ ports. Built with small business and enterprise users in mind. The 10 Port/8 PoE Gigabit PoE Switch is fully integrated to support security monitoring, providing fast packet forwarding capability and fast Ethernet transfer rates by utilizing the appropriate bandwidth to ensure clear images/smooth transmission and enough bandwidth for high-definition video.
