

Revit cable tray material change

Overview

Use the Object Styles command to set global material setting for Cable Trays Add view filters for the different cable trays to adjust the lines/patterns/transparency values. When trying to select a material for cable trays in Revit, the material parameter does not appear in the properties of the instance and type properties of cable trays: Currently in Revit, there is no material parameter in the cable tray type properties dialog. But filters don't carry through to IFC exports. To solve this, we need to generate materials based on. We can apply cable tray material in **MANAGE>OBJECT STYLES>CABLE TRAY & CABLE TRAY FITTING** (For all types). I know I can change the rung dimensions alright but the side rails. However, the issue I am facing now is all cable tray segments are applied with same perforated material. In the attached pic, I want to.
