

Scan QR code payment distribution box

Overview

With QR-enabled donation boxes, donors don't need to carry cash, fill out forms, or download apps. Smartphones are always in hand. Whether you're a nonprofit, school, retailer, or corporate campaigner, QR-driven giving offers a seamless, cashless way to boost donations on the spot. At My Charity. Payment Boxes from SCIVAS are compact desktop terminals that combine 2D barcode scanning and cashless payment acceptance in a single enclosure. They are engineered for high-traffic retail counters, quick-service environments, pharmacies, convenience stores and ticket offices where customers pay. PlastiQ Accept's QR code makes it easy for businesses to accept credit card payments in-person without any special terminals. Customers scan a customized QR code to quickly make a payment. In-person, on-location, on-the-go-getting paid just got easier. Codes can be placed anywhere, and supporters can simply scan them with their smartphones to access your fundraising campaign or donation page — no need to manually type in. Honesty Box makes cash-free payments simple. Add some simple text, and upload photos straight from your phone or computer.
