

# Supercomputing Center Uses Algerian Intelligent Cold Aisle Anti-Electro-Tracking Technology

## Overview

Algeria broke ground on its first AI-dedicated supercomputing center in Oran's Akid Lotfi district in March 2025, featuring GPU clusters for healthcare AI, industrial AI, cybersecurity, and smart city applications. The government targets 7% GDP contribution from AI by 2027, with investments in advanced infrastructure driving this goal. On Sunday, March 16, Minister of Post and Telecommunications Sid Ali Zerrouki officially launched the country's first high-performance. A number of options are available to facilities professionals looking to improve cooling efficiency and reduce resources consumed by their data centers. Beyond implementing basic measures such as sealing moisture out of the data center and improving air flow, aisle containment to prevent the mixing. Hybrid Liquid Cooling Is the O. And the momentum is just beginning.
