

Wheelighting distribution box usage location

Overview

Keep the module tucked up on the inner side of the frame, below the cab, and away from engine heat. You may keep it in the engine bay as long as it is distanced from anything warm. Note: For retrofit applications, Cooper Lighting recommends recording mapping. Contact Cooper Lighting Customer Service at 1-800-573-3600. Supporting and mounting structures must comply to industry standard capacity requirements and the environmental stress for the life of the system. This is a community mainly for WLED users to ask questions, show off their work, or help new users out! What an awesome box and way to use everything! ☺☺ Thanks, Quindor! Thanks for the Quad! Hey seeing it used like this is exactly the reason for making all this stuff! :D Looks great! I used the. Residential distribution boxes are usually smaller and built for lighter loads. They're great for homes and small offices. On the other hand, industrial boxes are designed for high-capacity use in places like factories, warehouses, or construction sites.
